The Sanghais and the A. and M. College clubs crossed bats on the ball field yesterday. The score was 6 to 3 in fa-wor of the Shanghais.

Sheriff J. W. Crowell, of Wilson, brought two convicts to the penitentiary, one was J. F. Joyner, who was set up two years for stealing an ox, and Henry Peacock, (col.) for perjury.

Mrs. L. H. Adams, when returning home from church Sunday night with her daughters and little son, were sudely shoved by a negro on Edenton St., opposite the Pullen place who caught them by the arms. Their cries for help brought succor from the neighbors who quickly responded to the appeal. This is not the first time that such an attack has been made in this neighbor. tack has been made in this neighborhood, but it seems the police so far have been unable to find the culprit.

The Canvass for the Celebration Fund -- Citizens Should Toe the Mark

Messrs. A. B. Stronach and James Boylan, of the citizens' committee on "Fourth of July" celebration, began work yesterday, and canvassed a part of the city with such success as leads them to hope they will be able to have a great day. Other portions of the city will be canvassed to-morrow.

These gentlemen are undertaking this wholly and solely for the good of the city. They have a right, therefore, to feel and think that in their canvass they should meet with a general and substantial reception.

It is for the benefit of the citizens individually and collectively; and if they want a big, creditable celebration, they must put up the funds to secure it. If they do not put up the funds-and

liberally, too-the citizens' committee will simply ABANDON THE PROJECT. That's They are working hard, and they expect that support. If they don't get it

they will drop the work. That settles it. The committee's plans are on a very attracted to Raleigh.

may come or not. A great display will attract their at-tention and low railroad rates will cause

their attendance. Now can and will the railroads offer some very special rates—say one cent a mile. It would pay the roads and give

many people an opportunity to spend a holiday in the capital city.

The names of the subscribers to the fund and the amounts given will be published in Wednesdays OHRONICLE.

It is Beginning to Make Talk--Some Opinions About It.

It is gratifying to find that the persistency of the CHRONICLE about another hotel is taking effect and the business men are talking about where it should be located and how to build it.

At any rate, and anyhow, that hotel is what we need most of all now, and gentlemen looking for "snaps" outside of Releigh can do just as well here as anywhere if they will give the city a

Which is the Best Typewriter?

Iu purchasing a writing machine, there are a number of important points to be taken into consideration. Among the most prominent are those of speed, durability and price. Speed-In order to attain a high rate

of speed upon the writing machine, it is necessary to become almost mechanical in operating it. When once the operator has become thoroughly familiar with the key-board, his finger should touch the required key as each letter comes into his mind without any conscious effort of his mental powers, just as the hand of the blind musician goes mechanically to the desired key on his piano. In machines with double case, which produce each character at a single stroke, this is possible. The Caligraph is the only type-writer that can truthfully lay claim to this feature. On other machines two fingers and three movements of the hands are necessary to produce any capital or punctuation mark with the consequent loss of the use of

Can it be argued that two movements of the hand can be made with greater ease and more readiness than one movement? (Can a horse run a mile in less time than half a mile?) What could be more simple than one thing at a time? Durability- This is an important consideration, aswriting machines are expensive and subject to continuous use, and in this respect we claim the CALIGRAPH is far ahead of all other competing machines. Its type-bars are adjustable, and in event of any lost motion in the journals it can be taken up instantly. No other machine possesses this unques-

tionable advantage. Price-This is another important feature and here too, the caligraph has certainly the advantage, as it varies in price, from 70; 85; to 100 dollars, while its only competitors in the market have a standing price of one hundred dollars. Manifolding.

to-day "STANDS AT THE HEAD" as a manifolding machine and is immensely popular for its advantage over other machines in this respect.

Particular attention is called to the New No. 3 machine recently gotten out by the Manufacturers of the Caligraph, which we claim, in mechanical excel lence, fine workmanship, accurate and easy adjustment, excells all other type-writers. The object has been to make the best writing machine possible without regard to cost or the labor entailed

compare it with type-writers of other makes, either old or new.

NEW YORK, June 9.-Messrs. Having recently completed a plant, with the most modern and improved machinery for the manufacture of ice, we are turning out the prettiest, clearest and firmest ice that has ever been manufactured in this country.

Every block being of uniform size, it packs in the car closely, and will suffer less loss in transportation than either natural ice or that manufactured by the old process.

As to purity, we challenge comparison. Every gallon of water we use is first evapora ed into steam under a pressure of one hundred pounds to the square inch and condensed before freezing, thus insuring water as pure as it comes from the clouds. Carload quantities on short notice. Full weights and careful packing guaranteed.
